ABOUT US

BRAPEGAS is a distributor and manufacturer company in the chemicals industry. We also offer services related with the application of each product.

BRAPEGAS is more than just a distribution company; we're a global partner to our customers and suppliers, earning customers for life, using our global network to provide market insight and expertise to grow our customers business, uncompromising safety and compliance, creating enduring supplier relationships and providing an innovative suite of value-added services.

OUR PRINCIPLES

We value relationships, earning customers for life, treating suppliers as long-term partners, and dealing with each other with candor and respect.

We succeed through performance, focusing on superior execution, product access, optimized logistics and productivity.

We thrive on profitable growth, seeking new markets and new opportunities, continuously innovating to be the distributor of choice.

OUR MISSION

is to provide specialized services in the Oil and Gas industry. Our goal is to distribute equipment and chemicals products and services for public and private companies that wish to improve their capabilities.

We also to deliver our customers with a engineer tailored-made service that may ease the purchase of supply needed in the industry. As a result we have successfully built strong relationships with customers and a solid financial ground.

We are committed to our goals and values by using state of the art technology to provide our customers with and superb cost and benefit ratio

REVERSE OSMOSIS ANTIFOULANT BCD-801 DISPERSANT

Application:

Osmotized Water Dispersant, Anti-scaling.

Benefits of the Product:

- Highly effective Anti-scaling for a broad specter of Waters.
- Prevents the formation of calcium carbonate on the membrane surfaces.
- Decreases the cleaning frequency of the membranes.
- Its low dosage offers a profitable application.
- Effective Sequesterant of Metallic Oxides.
- All the components of BCD-801 are ANSI/NSF 60 Standard certified in Reverse Osmosis Systems for Drinking Water Production.

OXYGEN SEQUESTERANT BCD-59396 OXYGEN SEQUESTERANT

Application:

Boiler Water Systems and Condensation Systems.

Benefits of the Product:

- Oxygen Sequesterant for boiler water feeding system.
- Protection for the metallurgy of equipment from heat transfer, avoiding replacements for damages.
- Neutralizing applications compatibility.
- Sole volatile inhibitor for metal passive surfaces, providing protection against corrosion on vapor-generating systems.

NEUTRALIZING AMINE BCD- AMINE/AMINE.

Application:

Boiler Water Systems and Condensation Systems.

Benefits of the Product:

- Excellent corrosion inhibitor.
- Protection for the metallurgy of equipment from heat transfer, avoiding replacements for damages.
- Neutralizing applications compatibility.
- Sole volatile inhibitor for metal passive surfaces, providing protection against corrosion on vapor-generating systems.

DELAYED COKING ANTI-FOAMING BCD-45160 ANTIESPUMANTE

Application:

Delayed Coking Units.

Benefits of the Product:

- Quick and Effective control of foam formation.
- Easy to handle.
- Inhibits the formation of stable foam.
- Controls the foaming at high temperatures with an excellent thermal stability.
- Reduces the silica contamination in final coke.

CORROSION INHIBITOR

BCD-81150 NEUTRALIZING AMINE

Application:
Distillation Units, Overhead units.

Benefits of the Product:

- Quick and Effective to reduce the corrosion in Condensation systems.
- Easy to handle.
- May be used in aqueous system or hydrocarbon mixed system.
- Protective property of the overhead systems metallurgy, of the crude distillation units.

FLOCCULANT

BCD- FLOCCULANT

Application:
Boiler Water systems and Reverse Osmosis Plants.

Benefits of the Product:

- Quick and Effective in control of particles.
- Easy to handle.
- Used to agglutinating the destabilized particles by the coagulant.
- Allows for a rapid removal of the disperse solids.

BIOCIDE

BCD- MICROBIOLOGY CONTROL BIocide

Application:
Boiler Water systems and Reverse Osmosis Plants.

Benefits of the Product:

- Quick and Effective microbiological control.
- Easy to handle.
- Used in the preservation of the membrane life avoiding the growth of biofilms on their surfaces.

COAGULANT

BCD- COAGULANT

Application:
Boiler Water systems and Reverse Osmosis Plants.

Benefits of the Product:

- Quick and Effective in control of particles.
- Easy to handle.
- Used to promote the destabilization of the particles allowing them to join, thus increasing in size in order to dispose them.
- Facilitates the rapid disposal of disperse solids.

SWEETENING CATALYZERS:

OXIDATION AND MERCAPTAN REMOVAL

BCD-ADITIVE 8020

Application:
oxidation and mercaptan removal in Liquid-liquid reactions.

Benefits of the Product:

- Used for Propane, Butane units and LPG and Merichem's Light Naphtha.
- Convenient packaging of 5-liter bottles..
- Unit monitoring.
- Ready-to-use product.
- Designed for units of caustic treatment (Merox Merichem).

BCD-AHF 99%

Application:

Catalyzer for Alkylation Units with HF.

Benefits of the Product:

- High Quality Alkylate Production for the gasolines.
- Anhydrous product with 99% of concentration.
- Presentation: 15-20 Ton ISO tanks.
- Safe Shipping and Handling.
- Training for Operations personnel.
- Available from North America and China.

POTASSIUM HIDROXIDE
BRIQUETTE FLAKES**Application:**

Hydrocarbon drying and neutralization, used in Alkylation Units with HF, Hydro treatment Units and current sweetening.

Benefits of the Product:

- Quick and Effective for Neutralizing in Crude refining processes.
- Convenient packaging of 1 ton and drums for easy handling.
- PH Control and effluent treatment.

BCD-KOH 99%
BRIQUETTES
– 90% FLAKES

HYDROFLUORIC ACID (ANHYDROUS)

METHYLETHYLKETONE (MEK)

BCD-MEK 99%

Application:
Paraffin remover of Lubricant Bases.

Benefits of the Product:

- Paraffin-precipitating agent.
- Product with 99% concentration.
- Presentation: 15-20Ton ISO Tanks, 208-liter drums and in bulk.
- Safe Shipping and Handling.
- Available from North America, Europe and Asia.

FURFURAL ALDEHIDO (FURFURAL)

BCD-SOLV FURFURAL

Application:
Production of Lubricant Bases.

Benefits of the Product:

- Solvent, Extractor of aromatics.
- Product with 99% concentration, Sugar cane and Corn based.
- Presentation: 15-20Ton ISO Tanks and in bulk.
- Safe Shipping and Handling.
- Available from the Caribbean and Asia.
